

WORKSHOPS / SEMINARS / PRESENTATIONS

Teaching that leaves a usable trace.

Practical sessions for faculty, graduate students, and teaching teams working across languages, cultures, disciplines, and changing technologies. Each session starts with a real problem in the room and ends with a next step participants can use.

ASSISTANT PROFESSOR | APU
Ritsumeikan Asia Pacific University

"The subject changes. The need for clear structure and room to think does not."

FACILITATION APPROACH

Choose the format by the outcome you need

WORKSHOP | 90 MIN - HALF DAY

Work on the problem

Test an activity, redesign a class component, or leave with an implementation plan.

SEMINAR | 45 - 90 MIN

Build shared language

Use a focused framework, cases, and structured discussion to think together.

PRESENTATION | 30 - 60 MIN

Open a wider question

Bring evidence, examples, and a clear provocation to a moderated conversation.

Six practical routes into the work

01

Teaching in English / EMI

Clear explanations, participation, feedback, and culturally responsive facilitation.

02

Intercultural communication

Redesign a classroom moment so more people can enter the dialogue.

03

Active learning design

Turn a lecture-heavy segment into an aligned activity with realistic timing.

04

Assessment after generative AI

Move beyond detection toward task design, process evidence, and judgment.

05

Pre-FD for graduate students

Build a one-page class outline and an activity future educators can facilitate.

06

Feedback and learning evidence

Gather usable evidence, interpret it carefully, and decide what to revise.

Participants should leave with something they can use on Monday.

Templates | rehearsal | feedback | a next-step plan

FROM JAPAN, ACROSS LANGUAGES, INTO PRACTICE

A workshop offer grounded in lived teaching.

THE SHORT BIO

I have lived and worked in Japan since 2009. After a MEXT scholarship and a PhD in information science at Hokkaido University, I worked across language-learning systems, natural language processing, intercultural classrooms, and faculty development. Before APU, I developed teaching and professional-development activities at Hokkaido University. Alongside university work, I write as Mazzi about Japan, games, media culture, and everyday life.

What I have led, taught, or facilitated

HOKKAIDO UNIVERSITY

Faculty development

Invited sessions on teaching in English, intercultural communication, syllabus design, and preparing for generative AI in the classroom.

APU | 2023-

Video Games in Society

A course connecting critical game analysis, social context, media literacy, and creative tasks; overall student survey score: 4.58 / 5.

APU | 2024

Presentation Skills for Higher Education

A practical workshop with 12 of 13 respondents reporting positive overall satisfaction and 11 of 13 expecting a change in future practice.

APU / RITSUMEIKAN | 2025-26

Space Management Program

Two years of facilitation around communication styles, leadership observation, presentations, feedback, and international project collaboration.

Clear structure. Room to think. Something to carry back.

I combine short input with templates, discussion, rehearsal, and feedback.

Possible participant takeaways

- One-page class outline
- Aligned activity plan
- Facilitation script or instruction set

- Reflection and feedback evidence
- A revised assessment or learning task
- A next-step plan for implementation

A simple way to begin

Send the audience, the live teaching question, preferred dates, and the format you have in mind. I will help shape the focus, examples, activities, and outcome around your setting.
